PROPRIETARY FABRIC SYSTEMS.

PERFORMANCE FIRST.

Every garment is designed from the fiber up. We test our fabrics under extreme heat, sweat saturation, and intense contact play to guarantee maximum mobility and zero distractions.

TECH FABRIC 01

HYPER-WICK POLYESTER

4-way mechanical stretch activewear yarn. Pulls perspiration away from skin instantly, evaporating moisture 3x faster than standard athletic poly.

TECH FABRIC 02

DYNAMIC AIR-MESH

Laser-mapped micro-perforation panels placed across high-heat zones. Provides continuous airflow during intense tournament matches.

TECH FABRIC 03

COMBED STREET COTTON

Heavyweight 100% pre-shrunk combed cotton. Ultra-soft handfeel with reinforced collar ribbing designed for enduring off-court streetwear comfort.

TECH FABRIC 04

WAFFLE MICROFIBER

High-density split-microfiber weave. Absorbs 5x its dry weight in moisture while remaining lightweight, lint-free, and rapid-drying on the bench.

THERMAL MOLECULAR SUBLIMATION STANDARDS

Dye pigments are infused directly into fibers under high pressure and heat. Graphics will never crack, peel, or fade.
